ILYA NESTEROV

Frontend developer

About me

I see frontend as the place where design meets logic. I'm curious, focused on usability, and enjoy turning ideas into clean, responsive interfaces that work — and work well.

SOFT SKILLS

- Responsibility
- Team collaboration
- Creativity and problem-solving
- Negotiation and communication
- Critical thinking

HARD SKILS

- Core Technologies: JavaScript, TypeScript, HTML, CSS
- Libraries & Frameworks: React, Redux Toolkit, Formik
- Testing tools: Jest, React Testing Library, Mocha, Chai
- Build Tools & Utilities: Webpack, Vite, Git, Husky, MirageJS
- Key Concepts & Practices: SPA, Responsive Design, State Management, REST API Integration, Service Workers

LANGUAGES

- Russian: Native
- English: B2
- Slovak: B2

CONTACTS

WORK EXPERIENCE

Sept 2024 – Present

- Developed a Single Page Application (SPA) using React, TypeScript, Redux Toolkit, and Formik.
- Built authentication flows, reusable UI components, course and skill management modules.
- Collaborated in a simulated team environment using Git, GitHub/GitLab workflows, and code reviews.
- Applied Redux architecture with createSlice, createAsyncThunk, and middleware.
- Used Web Workers to batch analytics events and improve performance.
- Implemented unit tests with Jest and React Testing Library; enforced coverage thresholds via Husky Git hooks.
- Applied responsive SCSS design and ensured adaptive UI for different screen sizes.
- Measured app performance (load time, memory usage, request speed) and sent metrics to a mock analytics endpoint.

PROJECT

- Built a customizable CV-application with using React and Redux Toolkit.
- Interacted with API and synchronized state with localStorage.
- Used Formik for complex form handling with validation.
- Added unit testing with coverage enforcement and automated pre-push testing with Husky.
- Ensured fully adaptive UI with SCSS and mobile-friendly layout.
- Focused on clean architecture, reusable components, and accessible design.

EDUCATION

- "National Institute of Business" Moscow Bachelor's degree in Management and Administration. Graduation in July 2022.
- "Front-end Development with AI Tools" EPAM Graduation in June 2025.

SHORT FACTS

- Former professional athlete with a disciplined and results-driven mindset
- Fast learner with a strong desire to grow in frontend development
- Passionate about UI/UX and building real-world web applications
